Oil IT Journal

Oil Information Technology Journal is a monthly newsletter focusing on oil and gas information technology. Coverage spans upstream geology and geophysics through drilling, production and distribution to plant data management, finance and e-business.

Oil IT Journal has a track record of providing clear and impartial analysis of the technical and commercial issues important to oil and gas CIOs, decision makers and end users. Industry news is covered in a timely manner, including corporate mergers and acquisitions, new software, national data banks, collaborative projects and consortia news.

Oil IT Journal has published monthly since 1996, reporting on emerging technologies including high end visualization and virtual reality, real time operations, oilfield modeling, simulation, optimization, knowledge, data and information management. In addition to coverage of application software from the major oil and gas service companies and vendors, Oil IT Journal tracks activity in related, horizontal IT fields such as XML technologies, emerging IT standards from the World Wide Web Consortium, and industry bodies such as SEG, SPE, AAPG, Energistics, PPDM, USPI-NL, FIATECH and POSC/CAESAR.

Oil IT Journal is available as a paper-based newsletter and as an online site license for deployment on corporate intranets.

"I read Oil IT Journal for a quick, concise look at what's happening in the upstream IT world as well as the E&P market in general. The publication's international perspective is also useful to the members of my executive management team."

John Gibson, former executive chairman, Paradigm and former president, Halliburton Energy Services

ORDERING INFORMATION

Oil IT Journal is available as a paper newsletter or an intranet-ready online electronic edition. The paper newsletter costs \$535 per year for 11 issues. The online edition comes in two sizes as follows. An online, single country license, including 5 paper copies, costs \$2,200 per year. For multinational organizations, an online, world wide site license, including 10 paper copies costs \$4,400 per year. Both online editions include an archive of past issues of Oil IT Journal going back to 1996 and 11 updates.

To subscribe to Oil IT Journal for one year please chose subscription type:
