

Delivering tomorrow's technology today to the oil and gas market is becoming fundamental to your company's success in this game-changing industry. NOF Energy and ITF have joined forces to give you the opportunity to meet with industry innovators from both service and operational perspectives and to learn what help is available to your business in this ever changing and competitive industry.

This joint NOF Energy and ITF event will give you access to some of the most prestigious companies in oil and gas, and you will hear at first-hand about what is on their wish list. You will have the chance to network and discuss where you can help with new ideas, solutions, technologies, innovative products / services.

The Hydrocarbon Exploration & Production (E&P) Industry is continually looking to foster technological improvements to enhance performance.

Total's Peter Macalister-Hall, Head of Research Partnerships with Total E&P UK will present Oil and Gas Operator Technology Needs. An outline of how innovation and emerging technology are managed within Total, the world's 4th largest publicly traded oil company - how and why R&D is sought, approved, funded and commercialised will be presented.

Technology Strategy Board's Filomena La Porta will outline details of the priorities in energy generation and supply technologies, funding opportunities and how TSB go about tapping in to these opportunities. Established by the Government last year to promote and invest in the development of technology for the benefit of business, the TSB strategy to 'connect and catalyse' has set out plans for investments in innovation representing an overall investment of around £1bn over the next 3 years. In Autumn 07 collaborative technology research and development projects in Materials for Energy and Low Carbon Energy Technologies were included.

Technip's Brett Howard, Offshore Engineering Division Manager will provide you with a service company's perspective of what developments in technologies and sustainable solutions are required to exploit the world's energy resources and where they are looking for assistance.

ITF's David Liddle, Technology Manager will detail their role as a conduit between technology innovators and the oil and gas industry. ITF are keen to meet with you to talk about how they assist in identifying operator and service company technology needs, fostering innovation and facilitating the development and implementation of new technologies through industry JIPs with up to 100% ITF member funding.

Don't miss your chance to hear from and network with these world-leading oil and gas companies.

A full event programme will be available soon.
